PROFESSIONAL SUMMARY

Senior Frontend Developer with 4+ years of experience building performant, accessible, and scalable web applications using **React.js** and **Next.js**. Deep expertise in component architecture, SSR/SSG/ISR rendering patterns, Core Web Vitals optimization, and state management with Redux Toolkit and Zustand. Proven ability to own frontend architecture end-to-end, deliver reusable design systems, and collaborate with cross-functional teams in enterprise and healthcare domains. Experienced building document-centric, data-rich web interfaces with strong attention to **WCAG accessibility** standards. Actively leverages AI tools — GitHub Copilot, Cursor, LLM-assisted workflows — to accelerate delivery and code quality.

TECHNICAL SKILLS

Core: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS
State & Data: Redux Toolkit, Zustand, React Context API, React Query, GraphQL, REST APIs
UI & Styling: Material UI, Bootstrap, React Router, Responsive Design, Component-Based Architecture
Performance: SSR, SSG, ISR, Core Web Vitals (LCP, CLS, FID, INP), Lazy Loading, Code Splitting, Image Optimization
Accessibility: WCAG 2.1 (A/AA), Semantic HTML, ARIA roles, screen reader compatibility, keyboard navigation
Tools & Practices: Git, GitLab CI/CD, Vercel, Firebase, Jest, React Testing Library, Agile/Scrum
AI Tools: GitHub Copilot, Cursor, LLM-assisted development, Prompt Engineering for dev workflows

WORK HISTORY

EXL Service (India) Private Limited – Manager, Band C1 <i>Noida, Uttar Pradesh (Remote)</i>	<i>20 Jan 2026 – 23 Feb 2026</i>
Cairs Solutions LLC – Senior Frontend Developer <i>Visakhapatnam, Andhra Pradesh (Remote)</i>	<i>25 Mar 2024 – 23 Oct 2025</i>
IndiaNIC Infotech Limited – Frontend Developer <i>Ahmedabad, Gujarat (Remote)</i>	<i>16 Aug 2021 – 20 Oct 2023</i>

PROFESSIONAL EXPERIENCE

Cairs Solutions LLC - Architected and owned frontend development across 4 production apps — ChildMatch, ParentFinder, MAP, and ChildConnect — using React.js and Next.js with SSR/SSG rendering patterns for optimal SEO and performance. - Built a reusable Material UI component library and standardized design tokens across all 4 apps, cutting per-feature UI build time by ~30% and ensuring pixel-perfect design consistency. - Enforced WCAG 2.1 AA accessibility standards across all apps — implementing semantic HTML, ARIA roles, and keyboard navigation — improving usability for users with disabilities and ensuring compliance for healthcare-domain products. - Optimized Core Web Vitals (LCP, CLS, FID) through lazy loading, image optimization, and code splitting — achieving measurable page performance improvements across production. - Implemented secure, role-based access control using Redux Toolkit, protecting sensitive data across 3+ distinct user roles with clean, maintainable state architecture. - Built Firebase-powered real-time media upload and authentication flows, supporting seamless multi-role onboarding with secure session management. - Leveraged GitHub Copilot and Cursor with custom prompt engineering workflows to reduce boilerplate authoring time by ~20% and accelerate sprint delivery.	<i>25 Mar 2024 – 23 Oct 2025</i>
IndiaNIC Infotech Limited - Delivered frontend for 3 scalable products — a recruitment portal, a Jira-style task manager, and Pointli — using Next.js (SSR/SSG), React.js, TypeScript, and SCSS. - Developed a Jira-style task manager UI with real-time updates, drag-and-drop boards, and role-based views using Redux Toolkit and GraphQL, adopted by 50+ internal users. - Engineered an interactive geo-fencing and attendance visualization module for Pointli using Google Maps API — enabling real-time compliance tracking with smooth, responsive map rendering. - Improved frontend performance by ~20% through ISR, lazy loading, and optimized re-render strategies — directly improving Core Web Vitals across all apps. - Wrote unit and integration tests using Jest and React Testing Library, maintaining >80% test coverage on critical UI modules. - Built reusable form components, custom hooks, and a shared utility library reducing duplicate code by ~30% across multiple projects. - Applied accessible design practices including semantic HTML, focusable components, and contrast-compliant styling — meeting WCAG 2.1 A criteria on the recruitment portal.	<i>16 Aug 2021 – 20 Oct 2023</i>

EDUCATION

Mohanlal Sukhadia University <i>Master of Computer Applications</i>	<i>2017 – 2020</i> <i>Udaipur, Rajasthan</i>
Bhupal Nobles P.G. College <i>Bachelor of Computer Science</i>	<i>2014 – 2017</i> <i>Udaipur, Rajasthan</i>
